

REMARKS

The Applicant believes that the Examiner has mistakenly characterized Group I (claims 1 - 25) as being drawn to "a clock circuit in a display unit for recovering a time reference signal associated with analog display data" and classified as belonging to class 345 subclass 213. The Applicant notes that claims 1 - 25 are drawn to a "circuit for use in a digital display unit for generating a plurality of pixel data elements from an analog image data received by said digital display unit" and should have been classified as belonging to class 345 subclass 698 that is the classification ascribed to group II (claims 26 - 43). Therefore the Applicant believes that claims 1 - 43 belong to the same group and the Applicant respectfully requests that the Examiner examine claims 1 - 43 and new claims 106 - 115 which are drawn to a circuit and a method for generating a plurality of image pixel data elements for display on a display screen.

If any fees are due in connection with the filing of this Response to Restriction Requirement, the Commissioner is hereby authorized to charge such fees to Deposit Account 500388 (Order No. GENSP103R1)

Should the Examiner believe that a further telephone conference would expedite the prosecution of this application, the undersigned can be reached at the telephone number set out below.

Respectfully submitted,  
BEYER WEAVER & THOMAS, LLP
